Second Call for Papers

CIBEC 2010 is intended to be a scientific gathering of researchers and students of biomedical engineering and healthcare technologies from around the world. The Conference will focus on the following topics:

- Biomedical signal and image processing
- Bioinformatics and data mining
- Biomechanics and prosthesis research
- Computer aided diagnosis and machine intelligence
- Bioinstrumentation and clinical engineering
- BioNanoTechnology
- Brain research and brain computer interfaces
- Healthcare information systems
- Clinical decision support systems

CIBEC 2010 will include tutorials, invited talks, presentation sessions, and poster sessions. A strong social program will also accompany the conference and a number of additional group and individual tours will be organized after the conference is over.

CIBEC 2010 will provide a number of booths for various industrial and governmental organizations to share their vision and exhibit their products and services.

New 4-page paper submission deadline is **August 27, 2010**.

Join us at CIBEC 2010 to share your scientific research results, meet local and international researchers and students, see the glorious Cairo, and maybe tour the wonderful land of Egypt!
